Design Document: Prototype for SPEFIX Homepage

1. General Project Information

- **Name**: SPEFIX
- **Description**: A subscription service platform for B2B solutions offering smart search, chatbot creation for social networks, and technical support chatbots for client communication.

2. Creating a User-Friendly Platform

All sections will be on a single page in the form of a landing page.

2.1 Header

- **Logo**: Clickable and redirects to the homepage (inactive if already on the homepage). Specify dimensions.
- **Navigation Menu**:
    - **Home**: Smooth scroll to the main section (introduction to the company and a brief overview of services).
    - **Solutions**: Smooth scroll to the services section.
    - **Pricing**: Smooth scroll to the pricing section.
    - **About Us**: Dropdown menu with the following items:
        - About Us
        - News
        - FAQ
        - Support
        - Reviews
        - Partners
    - Each item in the dropdown opens the corresponding page in a new window.

2.2 Website Content

Brief Description

"SPEFIX is your reliable IT partner providing comprehensive solutions for your business. We specialize in turnkey project development and the implementation of smart technologies to help your company reach new heights."

Solutions (Services Provided)

- **Service Cards**: Each service is displayed as a card with a small logo, service name, full product description, and a purchase button that redirects to the pricing section.
    - **Smart Search**: "With high-quality search, your clients will find the desired product quickly and make purchases 50% more often."
    - **Development**: "Custom development of ANY digital solutions, from minimal scripts to mobile development."
    - **Chatbot Builder**: "A unique chatbot builder for the world's most popular messengers, as well as for websites with AI integration capabilities."

Pricing

- **Pricing Cards**: Well-designed cards with icons, product names, and brief descriptions expandable with a small arrow. Each card has the price and a purchase button.
- **Discuss Pricing and Calculate Costs**: Detailed pricing discussion and cost calculation to be included.

Why Choose Us

- **Advantages**:
    - **Flexibility**: "Scalable subscription solutions suitable for businesses of any size."
    - **Savings**: "No initial costs - you only pay for what you use."
    - **Expert Support**: "Our team provides timely technical support and consultations."

Team

- **Team Section**: Photos of team members with brief descriptions of each participant. (Photos and descriptions need to be provided)

2.3 Footer

Terms and Security

- **Terms**: Opens a new tab with the terms of use.
- **Privacy**: Opens a new tab with the privacy policy.

Technical Support

- **Support**: Fixed at the bottom of the screen, redirects to the support page with a chat icon for user questions.
- **Frequently Asked Questions**: Help center in Q&A format.

Contacts

- Support email: [Support Email]
- Support phone number: [Support Phone Number]

Company

- **About Us**: Redirects to a separate page.
- **Blog**: Redirects to a separate page.
- **News**: Redirects to a separate page.

Social Media Icons

- **Icons for**: Telegram, Instagram, Facebook, TikTok. Clicking on these icons redirects to the respective social media pages.

Wireframes and Mockups

Create wireframes and mockups for each section of the landing page to provide a visual guide for developers.

Home Section

- **Layout**: Introduction to the company and a brief overview of services.
- **Content**: Brief Description as mentioned above.

Solutions Section

- **Layout**: Service cards with logos, descriptions, and purchase buttons.
- **Content**: Details for Smart Search, Development, and Chatbot Builder.

Pricing Section

- **Layout**: Pricing cards with icons, expandable descriptions, prices, and purchase buttons.
- **Content**: Pricing details and cost calculations.

Why Choose Us Section

- **Layout**: Highlighting the advantages of subscribing to SPEFIX solutions.
- **Content**: Flexibility, Savings, Expert Support descriptions.

Team Section

- **Layout**: Photos and descriptions of team members.
- **Content**: Photos and brief descriptions (to be provided).

Footer Section

- **Layout**: Links to terms, privacy, support, FAQ, contacts, and company pages.
- **Content**: Contact details, social media icons, and additional company information.

Technical Specifications

Technologies to Use

- **Frontend**: HTML, CSS, JavaScript (React or Vue.js for interactivity and smooth scrolling)
- **Backend**: Node.js or Django (for handling dropdown menus, page routing, and support chat functionality)
- **Database**: PostgreSQL or MongoDB (for storing user data, FAQ content, and support tickets)
- **Email Service**: SMTP or a service like SendGrid (for contact form and support communication)
- **Hosting**: AWS, Azure, or Heroku (for deploying the application)

Integration Points

- **Chatbot Integration**: For real-time support, integrate a chatbot API.
- **Social Media Links**: Ensure proper URLs for Telegram, Instagram, Facebook, and TikTok.
- **Contact Form**: Backend handling for support email and phone number submissions.

Testing and Deployment

- **Testing**: Use Jest or Mocha for frontend and backend testing. Ensure responsiveness across devices (desktop, tablet, mobile).
- **Deployment**: Use CI/CD pipelines for automatic deployment and updates.

Conclusion

This design document provides a comprehensive guide for developing a user-friendly and functional landing page for SPEFIX. By following these specifications, developers can create a cohesive and engaging platform that meets the business needs and provides an excellent user experience.

Prototype Design Document for SPEFIX Homepage

Overview

The purpose of this document is to outline the prototype design for the SPEFIX homepage, ensuring a user-friendly and engaging experience for potential clients. This document will detail the structure and key features of the homepage prototype.

General Project Information

- **Name**: SPEFIX
- **Description**: A subscription service platform for B2B solutions offering smart search, chatbot creation for social networks, and technical support chatbots for client communication.

Creating a User-Friendly Platform

The homepage will be a single-page landing page divided into several key sections.

1. Header

The header will contain the following elements:

- **Logo**: Clickable and redirects to the homepage. Dimensions to be specified.
- **Navigation Menu**:
  - **Home**: Smooth scroll to the main section.
  - **Solutions**: Smooth scroll to the services section.
  - **Pricing**: Smooth scroll to the pricing section.
  - **About Us**: Dropdown menu with the following items:
    - About Us
    - News
    - FAQ
    - Support
    - Reviews
    - Partners
  - Each item in the dropdown will open the corresponding page in a new window.

2. Website Content

2.1 Main Section

- **Brief Description**: "SPEFIX is your reliable IT partner providing comprehensive solutions for your business. We specialize in turnkey project development and the implementation of smart technologies to help your company reach new heights."

2.2 Solutions Section

- **Service Cards**: Each service will be displayed as a card with the following elements:
  - Small service logo
  - Service name

- ○ Full product description
- ○ Purchase button that redirects to the pricing section
- The services include:
  - ○ **Smart Search**: "With high-quality search, your clients will find the desired product quickly and make purchases 50% more often."
  - ○ **Development**: "Custom development of ANY digital solutions, from minimal scripts to mobile development."
  - ○ **Chatbot Builder**: "A unique chatbot builder for the world's most popular messengers, as well as for websites with AI integration capabilities."

2.3 Pricing Section

- **Pricing Cards**: Well-designed cards with icons, product names, and brief descriptions expandable with a small arrow. Each card will have the price and a purchase button.

2.4 Why Choose Us Section

- **Advantages**:
  - ○ **Flexibility**: "Scalable subscription solutions suitable for businesses of any size."
  - ○ **Savings**: "No initial costs - you only pay for what you use."
  - ○ **Expert Support**: "Our team provides timely technical support and consultations."

2.5 Team Section

- **Team Members**: Photos and brief descriptions of team members. (Photos and descriptions to be provided)

3. Footer

The footer will contain the following elements:

3.1 Terms and Security

- **Terms**: Opens a new tab with the terms of use.
- **Privacy**: Opens a new tab with the privacy policy.

3.2 Technical Support

- **Support**: Fixed at the bottom of the screen, redirects to the support page with a chat icon for user questions.
- **Frequently Asked Questions**: Help center in Q&A format.

3.3 Contacts

- Support email
- Support phone number

3.4 Company

- **About Us**: Redirects to a separate page.
- **Blog**: Redirects to a separate page.
- **News**: Redirects to a separate page.

3.5 Social Media Icons

- Icons for Telegram, Instagram, Facebook, TikTok. Clicking on these icons redirects to the respective social media pages.

Wireframes and Mockups

Provide wireframes and mockups for each section to serve as a visual guide.

Implementation Steps

1. **Header Implementation**: Create a sticky header with the logo and navigation menu.
2. **Main Section Implementation**: Add a brief description of SPEFIX.
3. **Solutions Section Implementation**: Create service cards with logos, descriptions, and purchase buttons.
4. **Pricing Section Implementation**: Design pricing cards with expandable descriptions and purchase buttons.
5. **Why Choose Us Section Implementation**: Highlight the advantages of subscribing to SPEFIX solutions.
6. **Team Section Implementation**: Add team member photos and descriptions.
7. **Footer Implementation**: Add links to terms, privacy, support, FAQ, contacts, and company pages. Include social media icons.

Technologies to Use

- **Frontend**: HTML, CSS, JavaScript (React or Vue.js for interactivity and smooth scrolling)
- **Backend**: Not required for the prototype stage
- **Design Tools**: Figma or Adobe XD for creating wireframes and mockups
